

ELECTRONIC VEHICLE SPEED LIMITER TO SUIT CABLE THROTTLE

The Groeneveld Electronic Vehicle Speed Limiter maintains control over the vehicles maximum speed by regulating the cable throttle, while still allowing the operator to use the full power of their vehicle (A securely coded programming device known as a "GINA" is required to program the maximum speed of the vehicle).

The electronic vehicle speed limiter controls vehicle overspeeding, independantly of the operator. With the introduction of stricter regulations regarding workplace safety, vehicle owners are now being encouraged to fit speed limiting devices onto their vehicles. Fitting a speed limiting device ensures that operators comply with the speed limits imposed within the workplace and on public roads. Resulting benefits are noticeable and often immediate.

Part No. 4613

Part No. 2213

FEATURES & BENEFITS

- Increases workplace and road safety
- Reduces speed related injuries
- Reduces fuel, running and maintenance costs
- Extends vehicle service life
- Maintenance and trouble free speed limiting
- Secure speed programming

APPLICATIONS

- Vehicles that have a cable throttle
- 4WD's
- Trucks
- Vans
- Buses

Part No. 4612	Electronic speed limiter 24V
Part No. 4613	Electronic speed limiter 12V waterproof
Part No. 2213	GINA programming tool
