

Cylinder Head Temperature

Cylinder head temperature switches, specifically designed for Deutz air-cooled engines.

- Single terminal N/O operation
- Available in 150°C, 170°C and 185°C

Kidde Fenwal

These temperature switches are designed specifically for applications where high temperature exposure, hermeticity and vibration resistance are required. A snap acting, bimetal disc, mounted in the tip of the probe, provides fast thermal response and rapid, positive contact action when the pre-set temperature is reached.

- 100% factory tested
- Snap action switching
- Hermetically sealed
- Tamper proof
- Available temperatures 205°F > 275°F
- Stainless steel shell

Telemecanique

A selection of Telemecanique switch gear used in the manufacture of many of our products.

- Contacts can be stacked for particular applications
- Snap action switching
- Mix and match actuators and contact bodies
- Proven reliability in field tests

Nason

Nason pressure and temperature switches are used in many pneumatic and hydraulic systems. Typical applications include marine, agricultural, construction, earthmoving, industrial and mining equipment. Normal operational life of Nason switches is in excess of one million cycles.

- Temperature and pressure switches
- Available media connections 1/8 NPT > 1/2 NPT
- A unique variety of electrical contact arrangements
- Snap action switching
- Pressure switches incorporate elastomeric diaphragms

Toggle Switches

A selection of extra heavy duty switches and protective covers.

- Extra heavy duty
- Environmentally sealed
- A variety of electrical contact arrangements
- Available in ST, DT and momentary configurations
