

# CM2000D REMOTE CONTROL TEST KIT

The **Control Master®** CM2000D Remote Control Test kit has been designed to allow on site service personnel to conduct fast fault finding and equipment diagnostics on remote control systems without calling in an RCT service technician.

The kit consists of a test unit, multi meter, scanner, power meter, variable power supply, leads, security key, o-ring grease and radio programmer. Full documentation is supplied to guide on site service personnel through the test procedure, allowing them to complete all necessary tests successfully.

The **Control Master®** CM2000D Remote Control Test kit includes the basic components required to test and diagnose the operation of standard **Control Master®** Remote Control systems.

Remote Control Technologies Pty Ltd recommends training on how to correctly use the test kits.

The **Control Master®** CM2000D Remote Control Test kit is designed to test that the remote control & remote receiver is working correctly.

Part No. 2060

CM2000D remote control test kit

## FEATURES & BENEFITS
