

CM2000D TRANSMITTER SERVICE KIT

The **Control Master®** CM2000D Transmitter Service kit has been designed to allow off shore customers to repair their remote controls on site without the need to wait for parts or to call in RCT service technicians.

All the parts needed to repair the transmitter are included in the kit, except for the unit housing. All items are bagged and tagged with part numbers for easy identification and re-ordering. Parts documentation is supplied to provide the customer with an easy re-ordering guide.

The kits are extremely robust and lightweight in design, making them ideal for field service repairs. RCT recommends comprehensive skills training on repair procedures and correct usage of the kits.

Part No. 2143

CM2000D transmitter service kit

FEATURES & BENEFITS

- Kit contains RCT's Original Equipment Manufactured parts to ensure maximum reliability and quality
- All parts are identified for easy re-ordering
- Allows on site service personnel to repair and service the unit without delay
- Minimises equipment downtime
- Lightweight kit allows service technicians to perform repairs in any location

This kit is designed for off shore customers only.
