

LINE OF SIGHT REMOTE CONTROL SYSTEM PACKAGE

The **Control Master®** Line of Sight Remote Control system package is an integral part of all remote control machine installations. The package is supplied in kit form within a purpose built metal carry case allowing for easy transportation and storage. Many customers stock this kit on site to support their remote mining operations. By having a spare set of remotes on site, remote control operators can rotate their remote control systems to help preserve equipment life and eliminate machine downtime, if a breakdown occurs.
