

# TELEREMOTE CABIN

The **Control Master®** Teleremote Cabin is setting the benchmark for Teleremote operations in the mining industry. Lightweight in design and constructed from a heavy duty steel shell, the **Control Master®** Teleremote Cabin can withstand the harshest of mining conditions (although it is not recommended for installation at close range to the blast face). Built for operator comfort, the **Control Master®** Teleremote Cabin incorporates all the amenities found in a station style setup. An inbuilt barrier system keeps the operator safe if the Teleremote cabin is positioned in close proximity to the remote control machine. The Teleremote chair, reverse cycle air conditioning, 1000V to 240V power supply and storage cabin amenities allows the operator to work in complete safety and comfort. The Teleremote cabin setup helps to improve overall operator productivity and remote mining efficiency.

The **Control Master®** Teleremote Cabin is now available in two cabin sizes. The new smaller size cabin offers greater portability and dramatically reduces shipping costs, whilst maintaining the same features seen in the larger Teleremote cabin setup.

## FEATURES & BENEFITS

- Completely safe, solid steel structure
- Cost effective long term solution
- Eliminates operator distractions
- Minimises operator fatigue
- Maximises productivity
- 19" LCD televisions
- Ergonomic Teleremote chair
- Heavy duty flush handle door
- Reverse cycle air conditioning
- Internally insulated
- Smoke detector
- Spare 24 volt and 12 volt internal outputs
- 4 way barrier system
- Heavy duty bench work
- U/G spec high voltage components and wiring
- 1000V to 240V power input
- Two way radio wiring and aerial internally wired
- Room for extra personnel (trainers, supervisors)

**Optional:** Guidance capability and Quick hitch attachment

### Teleremote cabin size options

Internal height: 2.02m

Internal height: 2.3m

Weight: 1.75 tonnes

Weight: 2 tonnes
