

TELEREMOTE PERSONNEL CARRIER

The **Control Master®** Teleremote Personnel Carrier (TPC) is a mobile Teleremote Cabin, which allows it to be used for multiple applications for surface and underground mining. The TPC has all the features of a Teleremote Cabin and does not require the use of any other machine to transport it.

The TPC has an inbuilt barrier system to protect it from remote controlled machines whilst operating in a protected Teleremote area. The TPC includes an ergonomic Teleremote chair allowing the operator to work comfortably for long periods. The dual monitors provide the operator with simultaneous front and rear vision of the machines operations.

The mobility of the TPC allows the operator to move their Teleremote operations to any location with minimal downtime. The flexibility of the TPC allows it to operate under the most extreme conditions where rough terrain doesn't permit easy access to personnel with Portable or Modular Teleremote Assembly (MTA) systems. The TPC is ideal for mine operations that have vehicles accessible to drives and stopes.

FEATURES & BENEFITS

- Integrated barrier system
- Ergonomic Teleremote chair
- CM2000D remote control set
- Video/data antennas bulkhead
- Video amplifier/line splitter
- On board Modular Teleremote Assembly (MTA)
- Side entry doorway
- Modular design allowing fast component rotation
- Extremely mobile & capable of working in most mining areas
- Mobility allows it to be used for different mining tasks including short term & long term contracts
- Operators can position their Teleremote operations anywhere they need to work
- Comfortable air-conditioned operating environment helps to reduce operator fatigue
- The TPC is protected by an inbuilt barrier system
- Secure working area limits operator distractions
- Made and serviced in Western Australia
- Modular design allowing fast component rotation
