

# BRAKE OIL TEMPERATURE WARNING SYSTEM

The **Muirhead®** Brake Oil Temperature Warning system is designed to monitor the rise in brake oil temperature on board mobile equipment. The system alerts the operator via a flashing LED to indicate the brake oil temperature is reaching a high level. If the brake oil temperature reduces to normal operating temperatures, the red LED will switch off.

In the event the operator continues to allow the brake oil temperature to rise, the system will latch the flashing LED, trigger a critical audible alarm and external red LED lamp.

The system can only be reset by the key reset switch when the brake oil temperature has returned to normal.

**Part No. 5598****Brake Oil Temperature Warning**

## FEATURES & BENEFITS

- Alert and critical warning levels
- Key reset switch
- External visual warning
- Multiple applications
- Reduced downtime by preventing component failure
- Prevents costly brake repairs
- User friendly
- Simplistic operation

**Customised options available**

## APPLICATIONS

**Off road Dump Trucks and Haulers**

Manufactured by:

**PERTH**

Unit 2-5/511 Abernethy Road  
Kewdale Western Australia 6105
