

ENGINE PROTECTION SYSTEM FOUR FUNCTIONS

The **Muirhead®** Engine Protection system (EPS) is designed to monitor practically any alarm condition on virtually any machine. The electronic EPS is smaller in design and integrates more features than all of its previous models. With no mechanical parts, the EPS control module is extremely reliable, easy to install and simple to use. The system follows in the footsteps of its predecessors delivering purpose built engine protection.

Every EPS control module can be customised to monitor known problems and functions commonly associated with equipment failure. This is one of the many reasons why **Muirhead®** products are the preferred equipment protection systems for Australian and international mines, contractors and Original Equipment Manufacturers.

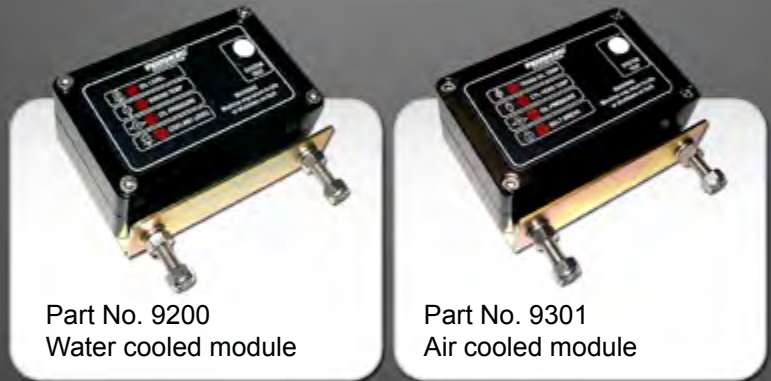

- Fully electronic
- Purpose built
- New compact design

Part No. 9200	Water cooled module
Part No. 9301	Air cooled module

FEATURES & BENEFITS

- Alarm only, return to idle/shutdown modes
- 4 inputs and 3 outputs
- System test function
- Individual fault indicators
- High quality connectors & mounting bracket
- Custom fault indicator labelling
- Compact and robust control panel design
- Reduces downtime
- Extends machine life
- Substantially reduces the risk of engine failure

Part No. 9200
Water cooled module

Part No. 9301
Air cooled module

Note: Additional looms, fittings, switches, lights and siren maybe required to perform a complete installation.
