

The **Muirhead®** Fatigue Warning system has been developed with operator safety in mind. This system once activated, randomly checks the operator's awareness using a visual warning. If this warning is not acknowledged by means of a reset switch, an audible alarm will sound until the operator resets the system.

The Muirhead® Fatigue Warning system is most effective in managing driver fatigue for fast moving earthmoving vehicles such as ON/OFF Highway trucks and other fast moving heavy equipment.

As an added feature, the fatigue warning system is versatile enough to be used on all other types of operating vehicles.

FEATURES & BENEFITS

- Universal applications
- User friendly design
- Customised electronic circuitry
- Audible and visual warning
- Random alert cycles
- Prevents accidents due to fatigue
- Improves operator awareness of their current fatigue levels
- Increases operator and community safety

Part No. 8614 Fatigue warning system (random)

Part No. 2458 Fatigue warning system (reflex)

Manufactured by:

PERTH

Unit 2-5/511 Abernethy Road
Kewdale Western Australia 6105
Ph: +61 8 9353 6577
Fax: +61 8 9353 6578

KALGOORLIE

24 Percy Road
Kalgoorlie Western Australia 6430
