

The **Muirhead®** Idle Timers are designed to moderate extreme operating temperatures before final shutdown occurs on mobile equipment. The idle timers regulate temperatures in the engine and turbo components by idling the engine for a set time period before final shutdown occurs.

The idle timers are a cost effective means of protecting diesel engines and turbo components from excessive wear due to immediate shutdown without an idle period.

Idle timers options:

Muirhead® Idle Down Timers Surface Mount ETR (Part No. 3629)

Muirhead® Idle Down Timers Integrated Mount ETR (Part No. 9087)

Muirhead® Idle Down Timers Integrated Mount ETS (Part No. 3459)

Customised idle timers are available with additional parameters such as lights & auxiliary shutoff on request.

FEATURES & BENEFITS

- Universal applications
- Surface mount or integrated mount
- Visual warning
- 12 & 24 volt
- Selectable idle time cycle
- Energised to run (ETR) or energised to stop (ETS) systems
- Steering accumulator bleed down output
- Extends the life of engines and turbo components
- Prevents costly engine repairs
- Simple and easy to use

- Integrated mount
- LED indicator & switch to be mounted in the dash
- Includes loom
- Energised to run system

Part No. 9087 Energised to run idle timer 24V

- Surface mounted
- LED indicator & switch built into the idle timer unit
- Energised to run system

Part No. 3629 Energised to run idle timer 24V

- Integrated mount
- LED indicator & switch to be mounted in the dash
- Includes loom
- Energised to stop system

Part No. 3459 Energised to stop idle timer 24V
