

# LADDER LIGHTING CONTROLLER

The **Muirhead®** Ladder Lighting Controller is designed to limit injuries when climbing and descending machine ladders. The lighting allows the operator to clearly see the ladder rungs as they board and exit their machine. The system allows the operator to turn on the ladder lights from either the cabin or ground position prior to exiting or boarding the machine.

Once the ladder lights has been illuminated, they will turn off after a pre-set time to minimise power consumption. The time delay for turning off the ladder lights can be adjusted between 1, 2, 4 and 8 minutes.

## FEATURES & BENEFITS:

- User friendly design
- Customised electronic circuitry
- Multi voltage control 8-33 V
- Easy to fit kits
- Reduces accidents related to boarding & exiting machines
- Improves occupational safety

## APPLICATIONS:

- Bulldozers
- Excavators
- Graders
- Loaders
- Trucks
- Surface Drills

A simple solution for a common workplace hazard.

Part No. 0834 Ladder lighting controller

PUTTING OPERATOR SAFETY FIRST!
