

# LIVE REFUEL SERVICE LOCKOUT CONTROL

The **Muirhead®** Live Refuel Service Lockout control (Part No. 8972) has been specifically designed to be the main lockout mechanism to ensure that the park brake remains applied and alarms activated whilst service personnel refuel or perform maintenance tasks on the machine.

The isolation mechanism activates the alarm and beacon to alert personnel near the machine that the vehicle is in the process of being serviced or refuelled. The system reduces the danger of drive off accidents and improves the overall servicing safety whilst the machine is still running.

## FEATURES

- ▶ Solid state switch
- ▶ No mechanical contacts
- ▶ Park brake applied LED indicator
- ▶ Visual alarm
- ▶ Non corrosive enclosure

## BENEFITS

- ▶ Improves refuelling safety
- ▶ Reduces drive off accidents
- ▶ Maintenance free operation

## Specifications

|                                   |                                |
|-----------------------------------|--------------------------------|
| Dimensions                        | 125mm x 80mm x 80mm            |
| Voltage                           | 10 – 30 VDC Factory set 24 VDC |
| Environment rating                | IP68                           |
| Weight including mounting bracket | 700 grams                      |
