

# LOW OIL/FUEL WARNING KITS

The **Muirhead®** Low Oil/Fuel Warning kits are used to detect low diesel fuel levels. When low fuel level is detected, the LED will illuminate and the audible alarm will sound.

The probe's electronic circuitry is enclosed within a single sealed unit. The level sensor will suit any diesel fuel application for either mobile or stationary equipment. A distinct advantage of this switch, over a float switch, is its compact design and high resistance to vibration. It contains no moving parts. The switch being isolated allows it to be used in an above ground application.

## FEATURES & BENEFITS:

- Fully sealed electronics
- Compact, robust design
- Monitors diesel fuel level
- 5 second inbuilt delay
- 12V/24V options available
- Prevents unnecessary maintenance repairs
- Avert costly downtime
- Improves equipment life

## APPLICATIONS:

Mobile machines, commercial vehicles, boats, generators, pumps and compressors, etc

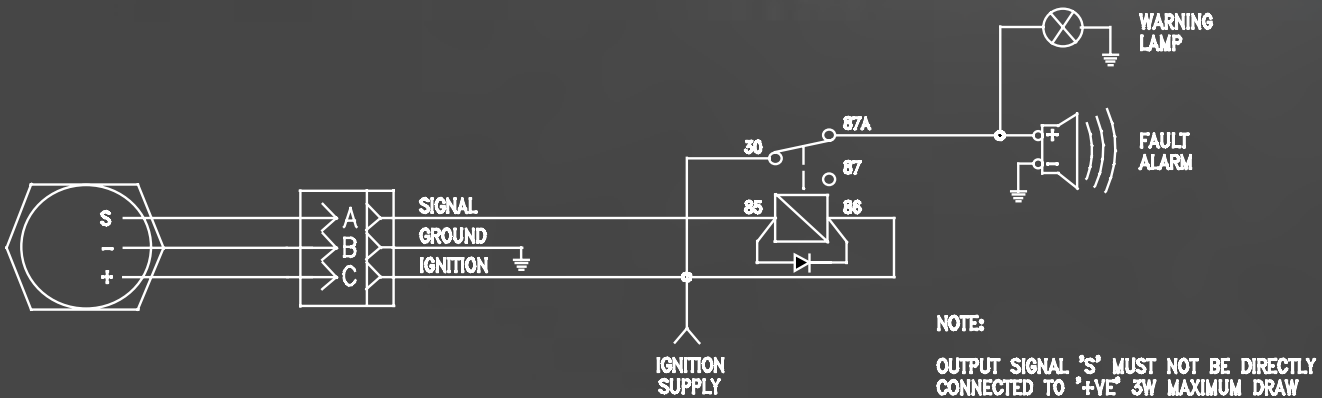

For applications up to 125°C

Part No. 8612 Low oil level kit with Part No. 3072

For applications over 125°C use the heavy duty sensor

Part No. 8690 Low oil level heavy duty sensor

Manufactured by:

**PERTH**

Unit 2-5/511 Abernethy Road  
Kewdale Western Australia 6105
