

# PARK BRAKE WARNING SYSTEM

The **Muirhead®** Park Brake Warning system is a preventative action system that not only alerts the operator that the machine's park brake is not applied, but also alerts any personnel within the vicinity of the machine.

When the machine's door(s) is open, the system alerts the operator and personnel by an audible horn and visual alarm indicating the machine's park brake has not been applied.

The system warns the operator when exiting the cab without applying the park brake. The system can be isolated by a key for maintenance purposes. A dash mounted LED warns the operator whilst the machine's horn alerts nearby personnel. When the machine's battery isolator is turned on, the system runs through a test cycle.

## FEATURES & BENEFITS

- Simple design
- Customised circuitry
- Override switch
- Audible & visual warnings
- Self test mode
- Helps prevent unattended machine run away accidents
- Protects personnel working on & near machine
- Increases occupational safety
- User friendly
- Simplistic operation

**Part No. 0230****Park brake warning system**

## APPLICATIONS

Trucks, Coal Haulers, Dozers, Graders, Scrapers.

Manufactured by:

**PERTH**
