FLEET CONTROL

# SMARTTRACK FLEET CONTROL SYSTEM

Improve fleet efficiency and productivity with total fleet control and vehicle reporting in Real Time.

The **Muirhead®** SmarTrack Fleet Management system is the latest in safety and productivity tools empowering business operators to get the most out of their fleet.

Fleet operation can be an expensive part of a business if normal wear and tear and ongoing costs are not monitored and managed carefully. The **Muirhead®** SmarTrack Fleet Management system records and stores the fleet data and then presents the information in detail. This allows business operators to use the information to better manage their fleet.

The system can be setup to suit many types of applications - options include basic driver access to a complete fleet monitoring package including impact, traction and driver activity and pre-start checklist.

The new pre-start checklist is fully configurable which allows each site to configure questions that suits their operation. Questions can be configured to present randomly and can be flagged as a critical monitoring functions. All information is stored and presented on the SmarTrack website for easy access. The system can be setup to have the critical information emailed to the appropriate personnel.

The **Muirhead®** SmarTrack Fleet Management system makes total fleet control easy and efficient.

## FEATURES & BENEFITS

- Fleet activity data
- Driver activity data
- Email alerts
- Automated download via GSM
- Configurable pre-start checklist
- Data available at the touch of a key
- Real Time data to improve productivity
- Fleet reporting improves site and driver management
