GPS ZONING

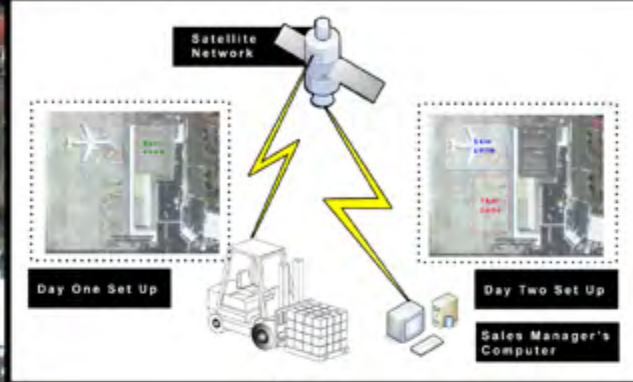

SMARTRACK GPS ZONE SPEED LIMITER

Day one speed zone set up

Day two speed zone set up

Zone speed set via geo-fencing software

transponder fitted on forklift

Geo-fencing technology allows site managers to control their entire speed zoned site and fleet from one simple program

The **Muirhead®** SmarTrack GPS speed limiter is designed to provide site managers with the ability to regulate all the zone speeds for their forklift fleet using a geo-fencing program.

The GPS zoning system has been specifically designed to regulate forklift speed around buildings, high traffic areas and will also reduce the speed of forklifts when they enter buildings.

The system provides site managers with the flexibility to change zone speeds at anytime to meet operational and site requirements.

FEATURES & BENEFITS

- On board forklift control unit for easy maintenance
- Programmable up to 4 speed zones
- Speed zones colour code for easy identification and assignment
- Exclusion zones can also be assigned
- Provides full command over speed zones for the site
- Online access available from any PC connected to the internet
- Easy to use software comprising of a site map and draw in map
- Change speed zone at anytime or day with immediate implementation

Part No. 5515 SmarTrack GPS zone system

Test Equipment is also available to make calibration easier.
