

# SMARTTRACK ZONE SPEED LIMITER

The **Muirhead®** SmarTrack Zone Speed Limiter system is designed to automatically turn on the forklift's speed limiter when it enters a high traffic/populated zone such as a warehouse. As the forklift exits the restricted zone, the system will automatically switch off the speed limiter. As an additional safety option certain forklift functions such as the fork height may also be disabled whilst in the restricted zone to prevent accidental damage and injury to personnel.

The system works by utilising barrier reflector panels mounted to all the access points surrounding the restricted zone. On board the forklift is a polarised photoelectric sensor which activates and deactivates the speed limiter as it crosses the barrier reflector panels.

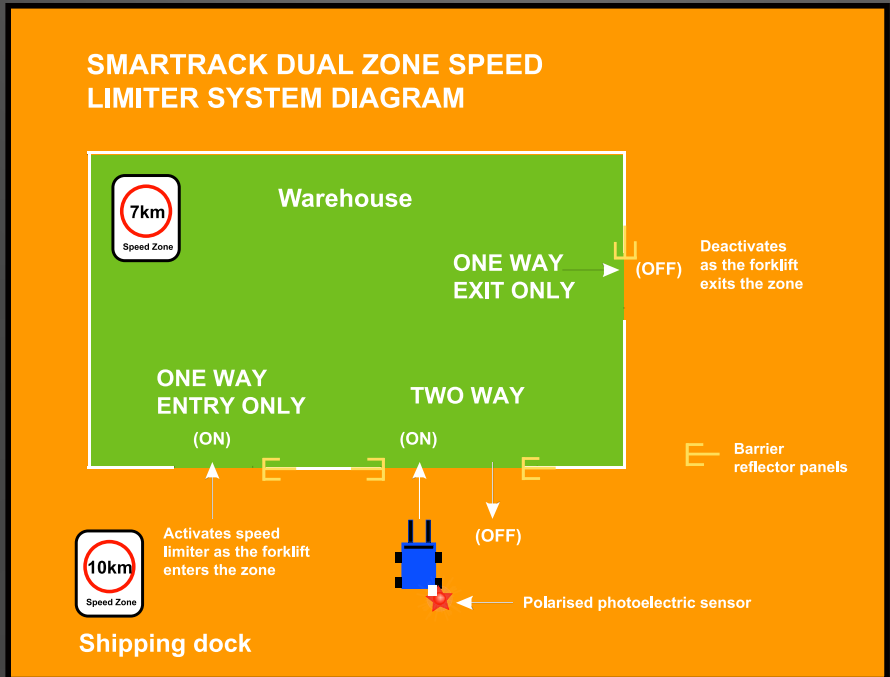

<b>Part No. 0434</b>	<b>SmarTrack zone kit</b>
<b>Part No. 6000</b>	<b>Forklift speed limiter kit FS-6 12V</b>

Test Equipment is also available to make calibration easier.

## FEATURES & BENEFITS

- Dual entry system (enter and exit)
- Instant activation as it enters zone
- Compatible with electronic or fly by wire speed limiters
- Increases workplace and road safety
- Reduces speed related injuries
- Reduces fuel, running and maintenance costs
- Extends equipment service life
- Maintenance and trouble free speed limiting
