

WATER AND SERVICE TRUCK SYSTEMS

RCT manufacture a range of systems to suit mine site water and service trucks. The systems have been designed to incorporate functions that will increase machine productivity and operator safety, reduce downtime and prevent premature component and or machine failures.

Water Truck

Water spray controls: A variety of solutions to control the water spray heads. These systems often integrate with other RCT controllers to provide a complete water truck solution.

Water Truck/Service Truck

Over RPM warning: A variety of systems available for the monitoring, alarming and recording of engine over RPM events.

Water Truck/Service Truck

Hoist controls: Designed for use on later model trucks where the PWM hoist control has been utilised as a pump drive.

Water Truck

Automatic throttle controls: These systems incorporate various types of machine interlocks enabling an automatic throttle up control for dispensing water when the truck is stationary.

Service Truck

Throttle and PTO control: These systems incorporate various types of machine interlocks enabling an automatic throttle up control and PTO for lube / fuel dispensing when the truck is parked correctly.

Water Truck/Service Truck

Road speed limiters: Systems designed to limit the ground speed of site vehicles.

Water Truck/Service Truck

Brake oil over temperature systems: Designed to monitor brake oil temperatures, the system will pre-alarm on near overheat and if temperatures continue to rise it will alarm on overheat.
