

# POWER LIGHT™

# VL LIGHTS

The PowerLight™ VL series lights are one of the smallest floodlighting systems available on the market today. Robust cast alloy housings protect the glass faced, dichroic insert. Sealed to prevent corrosion of internal parts, these lights have an extremely high light output for their relative small size and low current draw. The VL lights use low voltage DC for operation and do not require expensive ballast's, globes or lenses in case of damage.

## FEATURES & BENEFITS

- High output light inserts
- Robust cast alloy housing
- Low current draw
- Mounting centres 85.5mm
- Available with military style connector or flying lead
- Long life
- Damage & corrosion resistant
- Low power usage
- Reduced lighting costs (running & replacement)

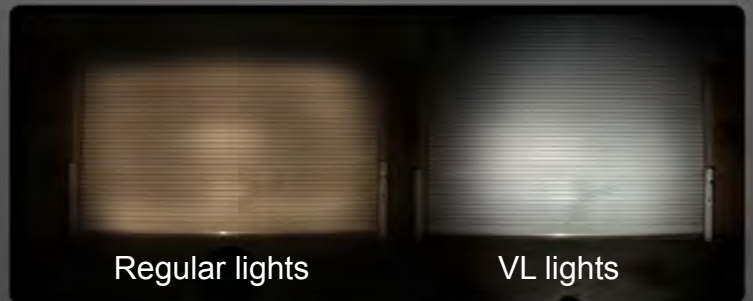

## APPLICATIONS

- Underground mining machinery
- Service trucks
- Drilling equipment
- Off road vehicles
- Marine

## SPECIFICATIONS

- Voltage: 12V or 24V
- Light output: Equivalent to 24V - 150W
- Current draw: 2.3 amps @ 24V
- Mount: 2 x 10mm holes, 85.5mm apart
- Dimensions: L: 100mm, W: 106mm, D: 66mm
- Weight: 584 grams
